With virtual facial feminization technology Full face and frankly looks like a little boy.. There's limits to that kind of software, you know I am currently using CS2 (on OS X) and there is a friend of mine who used a photo of mine and let's say.. Manipulated it with Photoshop So I want to get him back and get one of his photos and turn him into a woman.

Your final result will depend on the procedures you choose, your individual anatomy, how you heal, and the abilities and techniques of your surgeon.. What I Do: 1 I assess your face and explain what makes it look masculine I explain which surgical procedures are likely to make your face more feminine.. Finally, it allows you to convert the face of your friend to 50% chimpanzee The image must be in jpeg or gif format, and for best results it needs to be clear at the 2'x2' size.. Best Answer: This is not exactly what you want, but there's a neat website at which allows you to take a jpeg image of a face and make a number of changes to it: Baby, child, teenager, young adult, old adult, feminize (if a male), masculinize (if a female), as well as paintings by Botticelli, Mucha, and one other (I forget).. What type of tools could I use for things like feminizing the face, body, etc ? Anything would be greatly appreciated.. Welcome to Virtual FFS The Virtual Facial Feminisation Website I've created this site to help you plan your facial feminisation surgery. 0041d406d9 [Adobe Premiere Mac Free Download Full Version](#)
