The Question SuperUser reader KronoS poses the question many geeks have asked at one point: I've been wondering recently about how the infrastructure of the Internet really works.. I know that I have an Internet Service Provider (ISP) that supplies my connection to the Internet.. The Answer Courtesy of SuperUser contributor Tom Wijsman, we're treated to a detailed peek at how we can determine who specifically is providing internet access to our ISP and what it means to be part of the provider-to-the-providers network.
