Frankly, that stuff went out with DOS 5 0: And I do not care to revisit those days.. The file format is an easy to use international standard Microsoft Office, whether installed as a standalone set of apps or as part of the subscription-based Office 365 service, is the colossus of office suites, one that much of the world uses by default.. Not only for graphic design and audio/video editors anymore, Mac OS, with its simplistic design, has caught the appeal of many more common users who want a system that just works.. And I do not use command line programs: you must remember a whole bunch of complicated command line sequences and be a good touch typist as well.. And my readers expect the same Please, in the future do not post any program as a suggestion for this list for which you must compile your own binary! And, I would highly dissuade you from suggesting anymore command line programs: Because I do not intend to post them unless they really fulfill a critical function that no other program (With a GUI) can match.
